Sealco Temperature Strips

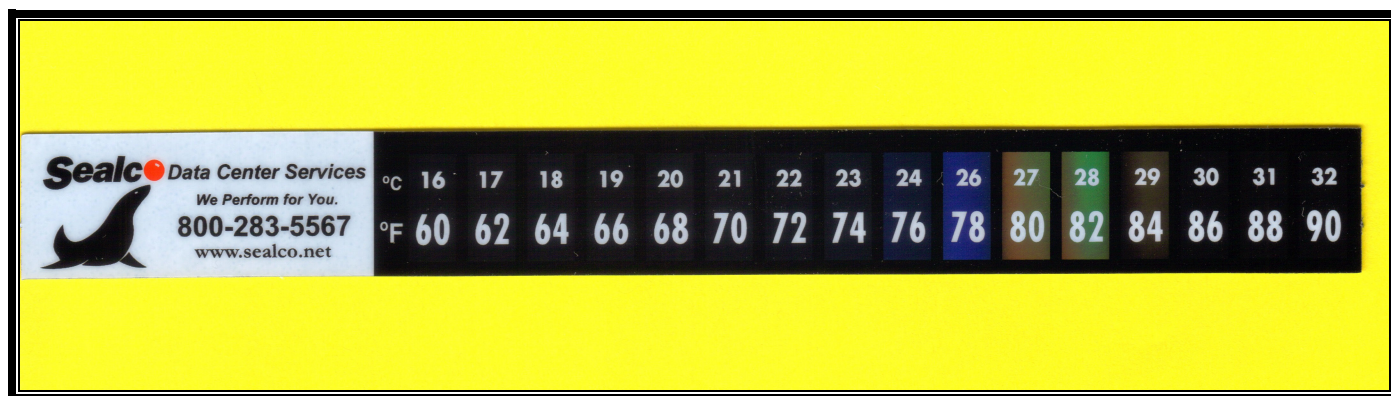

Sealco is proud to introduce our newest product for your data center!!

The Sealco temperature strip is a liquid crystal thermometer with an acrylic self-adhesive backing that quickly and accurately measures the air-intake temperature of IT equipment. This strip should be used with IT equipment where the potential for hotspots or other heat-related issues exists. It can be attached to the front surface of a perforated door on a cabinet.

The Sealco temperature strip has both Celsius and Fahrenheit temperature scales.

Celsius Scale: 16 Degrees C to 32 Degrees C Fahrenheit Scale: 60 degrees F to 90 degrees F

Size: Length: 7" Width: .75" Thickness: 10 mils

Call Sealco today to get more information on our newest product and other data center products.
