

## **How to read Liquid Crystal reversible temperature labels.**

**Instructions: Remove liner from self-adhesive backing. Apply to clean, dry surface.**

**Green indicates the correct temperature. If green is not visible, the temperature will be mid way between the illuminated tan and blue windows.**

**Note: Color change will occur when temperature is between range on temperature label.**

**KEEP IN MIND THAT THESE TEMPERATURE LABELS ARE INDICATORS, NOT CLINICAL THERMOMETERS.**

**They are accurate within +/- 2 degrees.**
